# Machine Learning for plant phenology

#### ML at Rosario

#### ML at Rosario

### Rosario's main product is...

# Long history of Machine Learning applications to agro-industrial problems:

## -Classical Machine Vision

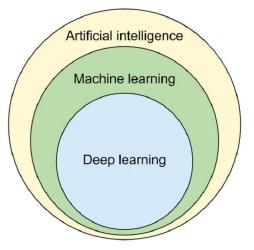

-ML for Mass Spectrometry

-Deep Learning

# Machine Learning?

#### What is ML?

#### **Artificial Intelligence**

Any technique that enables computers to mimic human intelligence. It includes *machine learning* 

#### **Machine Learning**

A subset of AI that includes techniques that enable machines to improve at tasks with experience. It includes *deep learning* 

#### **Deep Learning**

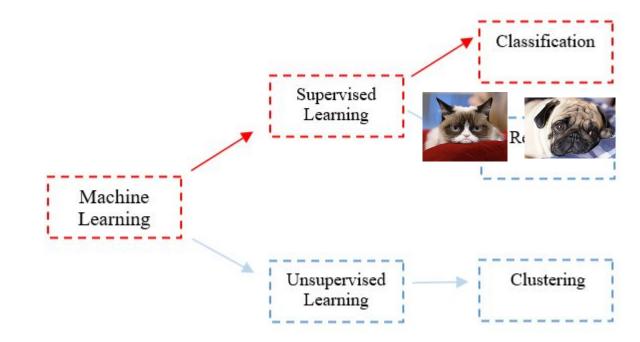

Ŷ

A subset of machine learning based on neural networks that permit a machine to train itself to perform a task.

Figure from https://docs.microsoft.com/en-us/azure/machine-learning/concept-deep-learning-vs-machine-learning

#### What is ML?

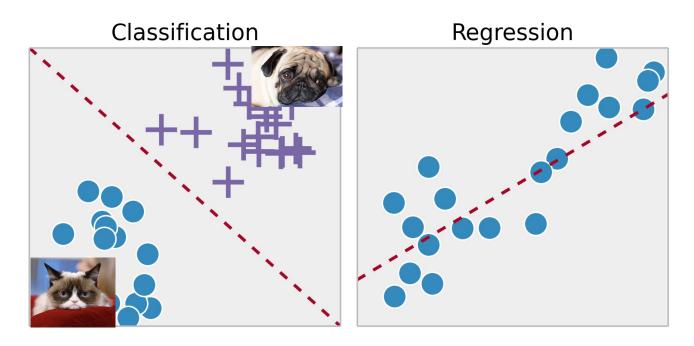

From: Sossi Alaoui, Safae & Aksasse, B. & Farhaoui, Yousef. (2020). 10.1007/978-3-030-23672-4\_6.

#### What is ML?

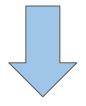

# Machine Learning in plant breeding

#### ML in plant breeding

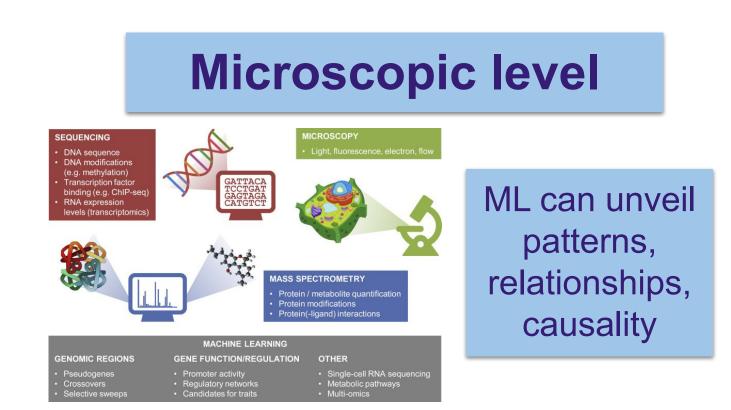

# **Microscopic level**

## **Macroscopic level**

#### ML at Microscopic level

#### ML in plant breeding

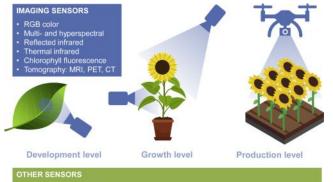

# **Microscopic level**

## **Macroscopic level**

#### ML at Macroscopic level

ant: weight, water-use efficiency, nutrient uptake, ...

Environment: soil composition, temperature, light, humidity, CO<sub>2</sub> level, weather, .

DEVELOPMENT	MACHINE LEARNING GROWTH	PRODUCTION
Traits on the level of plant organs (e.g., leaf area, internode length, photosynthetic activity)	Traits on the level of the complete plant (e.g., plant height, biomass, plant stress)	Traits on the level of the field (e.g., yield estimation, spatial differences)

ML can measure, evaluate, compare

# ML for Image Analysis

#### **Classic computer vision**

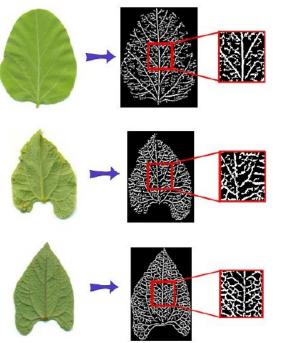

Larese, M.G. & Granitto, P.M. Machine Vision and Applications (2016) 27: 709

#### Image analysis

Leaf venation analysis for cultivar identification

### Detection of keypoints and relevant patterns

Cultivar identification: Average human accuracy: 45% Best result for automatic system: 60%

#### Image analysis

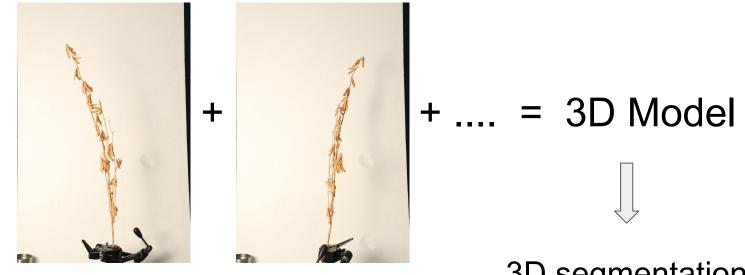

Counting seeds in pods (phenotyping) Codigo: 112--112

Collaboration with IICAR (Conicet/UNR)

#### Image analysis

#### 3D phenotyping of dried soybean plants

3D segmentation and analysis

Ongoing work

# Deep Learning

#### Leaf venation (again)

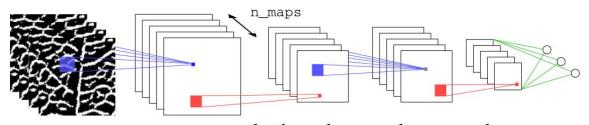

original image

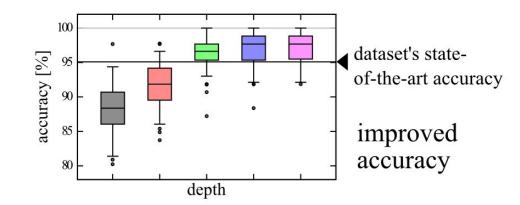

vein segmentation

central patch

convolutional neural network

Grinblat, G. L., Uzal, L.C., Larese, M. G. & Granitto, P. M. (2016). Deep learning for plant identification using vein morphological patterns, Computers and Electronics in Agriculture, 127, 424.

#### Leaf venation (again)

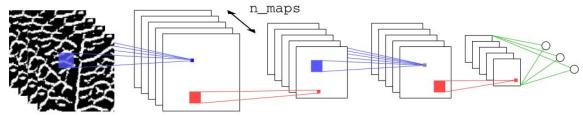

original image

vein segmentation

central patch

convolutional neural network

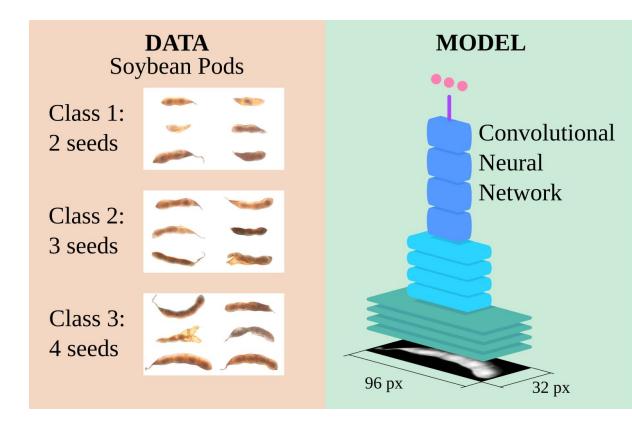

#### relevant patterns visualization
